Re: OKD007208747

Dear Mr. Lehman:

On August 3, 1988, Scott Thompson and Catherine Sharp of the Waste Management Service, Oklahoma State Department of Health, visited D & K Plating Company to evaluate your waste handling procedures. Several soil samples were collected and analyzed for metals content. The results of those samples are attached.

Due to high levels of cadmium in the soil around the facility, these soils are hazardous waste as per Rule 210 of the Oklahoma Rules and Regulations for Industrial Waste Management and 40 CFR 261.24.

As the first step toward cleaning up the area, please submit to our office within forty-five (45) days of receipt of this letter a detailed plan specifying how you plan to: (1) Assess the extent of the contamination and (2) Clean up the area surrounding your plating building, as required by Rule 210 and 710.

If you require further information regarding this matter, please contact Catherine Sharp at (405) 271-7073 or Scott Thompson at (405) 271-7168.

Sincerely,

R. A. Rabatine for
